

UHU

UHU developed **The All Purpose Adhesive**, the first universal adhesive in 1932 and has since grown into an international brand sold in **over 125 countries** in which over 600 million consumers trust UHU's gluing performance. Its constant search for greater effectiveness, performance, safety and versatility has led to the creation of **over 50 different types of adhesives**, serving multiple target groups in all stages of life. Nowadays UHU is offering a complete and competent assortment of adhesives, including **paper- and craft glues** for school and families, up to powerful **repair- and construction** adhesives for DIYers, craftsmen and professionals.

From the sourcing of raw material to the packaging of the products, the brand is committed to **sustainability**. UHU stic ReNATURE and UHU AP twist & glue ReNATURE are the best examples of this commitment. Thanks to their highly sustainable formulations and -packaging these adhesives belong to the most sustainable ones in the market.

Bison

Bison was founded in **1938** and has ever since developed into a well-known international brand that offers its high-quality adhesives in **over 70 countries**, serving a wide range of target groups. Nowadays Bison is offering a complete and competent assortment, from **creative and repair adhesive solutions** for every family, up to powerful construction adhesives and sealants for DIYers and professionals.

Bison Kit® and Montage Kit® are just two examples of the well-known Bison products within the extensive range of solutions for every gluing, sealing and maintenance job. Bison is the **leading adhesive and sealant brand in the DIY market** in the Benelux and is also an important player in multiple South and East European markets and the Middle East.

Bison is continuously developing the product assortment to satisfy and exceed end-user expectations. Both on product properties as well as sustainability aspects. Over the recent years, Bison has developed several innovative **SMP technology-based product concepts**, offering end-users powerful, easy-to-use, fast, and safe solutions. With this technology, Bison is able to develop **solvent- and PU-free products** across categories, with improved product properties, meeting the highest standards.
